

Poole Business Services

Street Cleansing

Well managed grounds, car parks and communal areas say a lot about you and your business. We offer a tailor made service designed around your specific needs and requirements. From business premises to educational establishments, we are able to offer a comprehensive and flexible package of services.

Our work in the commercial sector and with local organisations ranges from grass cutting to mechanical sweeping, and from landscape construction to drain cleaning.

Based in Poole we operate an extensive range of machinery within our fleet. This ensures we are able to offer the widest range of services of any operator in the local area, whilst providing business continuity.

Our local staff are correctly certificated for the works they carry out and have support from our own dedicated training team to ensure the highest standards of service.

We have a waste carriers licence and adhere to all the regulations for the disposal of waste, dangerous goods and hazardous materials, ensuring your legal compliance and peace of mind.

Services we offer

Our services meet the needs of customers requiring grounds maintenance and street cleansing services and can be delivered to retail parks, trading estates, education establishments, public sector organisations and more.

We can provide regular scheduled work programmes or occasional work arrangements tailored to meet your requirements. Some of the services we can offer you are:

- **Mechanical sweeping, litter collection and rubbish removal**

We are able to offer fully flexible working arrangements to achieve the maximum standard of cleanliness for all aspects of your business, which includes regular or one off work as required.

- **Mechanical gully emptying and surface water drain jetting**

In order to ensure your business runs efficiently, we offer an extensive gully emptying and cleaning service, which helps to safeguard against blockages and standing water in walkways/pavements.

- **Pressure cleaning and graffiti removal**

Graffiti is a common problem in many urban areas, but thankfully we offer a number of solutions involving the use of our vehicles and chemicals, ensuring care for both your business and the environment.

Why **you should choose us**
